

Case Study

Government | Healthcare
BPO

Data-Core was selected by the Client to be a part of their delivery team, which provides medical claim processing services for Medicaid. Data-Core was further engaged to build a Center of Excellence which would be geared to deliver Medicaid claim processing services for the Client.

Data-Core was first engaged to provide medical claim processing services in 1995. During the next 10 years, the Client transferred the processing of Medicaid medical claims for three states from their then-vendors to Data-Core. On average, Data-Core processes 2,400,000 medical claim forms of various types which have to be imaged (red drop-out) and processed through a combination of OCR and data entry/data correction procedures. Data-Core finally generates an XML-compliant EDI transaction for delivery to the medical claim processing gateway.
